

SUMMER INTERNSHIP PRESENTATION REPORT

Web Development Internship

HTML5, CSS3, JavaScript & Full-Stack Deployment

STUDENT CREDENTIALS

Student Name	Subhash Chandra Yadav
Enrollment / Roll No.	25SCS1003004257
Program & Semester	2nd Semester
Host Organization	Thiranex – Skill Development & Future Tech
Internship Duration	30 Jul 2026 – 29 Aug 2026
Intern ID	THX-JUL3026-504

Candidate & Program Overview

Key details of the student and the internship program

S Candidate Details

Student Name	Subhash Chandra Yadav
Roll / Enrollment No.	25SCS1003004257
Semester	2nd Semester
University	IILM University, Greater Noida, U.P.
Found Internship Via	Internshala

P Internship Profile

Role Offered	Intern – Web Development
Host Organization	Thiranex – Skill Development & Future Tech
Duration	30 Jul – 29 Aug 2026 (~4.5 Weeks)
Intern ID	THX-JUL3026-504
Modules Completed	5 of 5 (100% on-track)

Internship at a Glance

A quick snapshot of the internship engagement

1

ORGANIZATION

Thiranex

2

DURATION

30 Jul – 29 Aug 2026

3

DOMAIN

Web Development

4

MODE

Remote / Online

ABOUT THE ROLE

Undertook a structured, milestone-based Web Development internship at Thiranex, covering the full front-end development lifecycle — from accessible semantic HTML and responsive CSS3, through interactive JavaScript applications, to asynchronous API integration and full-stack deployment. Each of the five assigned modules was submitted on time and marked “Completed Successfully” on the official tracking portal.

Internship Offer Letter

Formal offer extended by Thiranex confirming the internship terms

OFFER DETAILS

Intern Name

Subhash Chandra Yadav

Intern ID

THX-JUL3026-504

Internship Role

Intern – Web Development

Commencement Date

30 Jul 2026

Completion Date

29 Aug 2026

Work Mode

Remote / Project-Based

Issued By

Thiranex – Skill Development & Future Tech

About the Organization

Thiranex — Skill Development & Future Tech

Organization Overview

Thiranex is a skill development and future-technology focused platform offering structured, project-based internship programs in modern web development. The program builds industry-relevant, hands-on competencies through progressively advanced, real-world coding assignments, with continuous progress tracking via an online submission portal.

- ✓ Structured, milestone-based internship tracks
- ✓ Emphasis on modern, industry-standard tools & practices
- ✓ Task-driven learning with defined deliverables and deadlines
- ✓ Continuous progress tracking via an online submission portal

Objectives of the Internship

What the internship set out to achieve

1

Build Strong Foundations

Master semantic HTML5 and accessibility-first markup as the base of every project.

2

Design Responsively

Apply modern CSS3 (Grid, Flexbox, custom properties) for adaptive, theme-aware interfaces.

3

Engineer with JavaScript

Implement stateful, interactive client-side applications using core JS and the DOM.

4

Integrate Live Data

Consume real-world REST APIs asynchronously with robust error handling.

Module 1: HTML5 Semantic Structure & Accessibility

Due Date: 06 Aug 2026 • Status: Completed Successfully

1

TASK DESCRIPTION

Built a multi-page personal portfolio website adhering strictly to modern semantic HTML5 standards and WCAG accessibility guidelines.

KEY FEATURES IMPLEMENTED

- ✓ Used semantic tags (header, nav, main, section, article, footer)
- ✓ Implemented ARIA labels and roles for screen readers
- ✓ Created optimized, SEO-friendly meta tags
- ✓ Built an accessible, tab-navigable contact form

EXPECTED OUTCOME

A fully accessible, semantic skeleton of a portfolio website scoring 100 on Lighthouse Accessibility and SEO audits.

✓ Completed Successfully

Module 2: Advanced CSS3 & Responsive Architecture

Due Date: 13 Aug 2026 • Status: Completed Successfully

2

TASK DESCRIPTION

Transformed the semantic portfolio into a visually stunning, fully responsive design using advanced CSS3 properties and modern layout architectures.

KEY FEATURES IMPLEMENTED

- ✓ Used CSS Grid for complex, two-dimensional page layouts
- ✓ Employed Flexbox for localized component alignment
- ✓ Implemented mobile-first responsive media queries
- ✓ Created custom CSS variables for a dynamic light/dark theme

EXPECTED OUTCOME

A pixel-perfect, highly responsive website adapting flawlessly across mobile, tablet and desktop screens.

✓ Completed Successfully

Module 3: JavaScript Logic & State Management

Due Date: 20 Aug 2026 • Status: Completed Successfully

3

TASK DESCRIPTION

Developed an interactive, client-side To-Do List application to master DOM manipulation, event handling and local data persistence.

KEY FEATURES IMPLEMENTED

- ✓ Implemented full CRUD (Create, Read, Update, Delete) functionality
- ✓ Persisted data automatically using window.localStorage
- ✓ Built advanced filtering (All, Active, Completed)
- ✓ Created dynamic DOM elements with delegated event listeners

EXPECTED OUTCOME

A fully functional, state-driven task management application that retains user data across browser reloads.

✓ Completed Successfully

Module 4: Asynchronous JavaScript & RESTful APIs

Due Date: 27 Aug 2026 • Status: Completed Successfully

4

TASK DESCRIPTION

Built a real-time Weather Dashboard by fetching and processing JSON data from a public REST API using asynchronous JavaScript.

KEY FEATURES IMPLEMENTED

- ✓ Fetched real-time data using the Fetch API and async/await
- ✓ Implemented comprehensive error handling for failed requests
- ✓ Parsed and dynamically rendered complex nested JSON objects
- ✓ Created a search function to retrieve weather by city name

EXPECTED OUTCOME

A dynamic dashboard displaying accurate, live weather metrics (temperature, humidity, wind speed) based on user input.

✓ Completed Successfully

Module 5: Full-Stack Deployment & Project Architecture

Due Date: 29 Aug 2026 • Status: Completed Successfully

5

TASK DESCRIPTION

Combined all prior knowledge to build, optimize and deploy a comprehensive Web Development Capstone Project — an E-commerce product catalog.

KEY FEATURES IMPLEMENTED

- ✓ Architected a modular frontend application
- ✓ Implemented client-side routing for seamless navigation
- ✓ Optimized assets (images, minified code) for performance
- ✓ Deployed the live application to a modern platform (Vercel/Netlify/Render)

EXPECTED OUTCOME

A live, production-ready web application with a public URL demonstrating professional-grade web development capability.

✓ Completed Successfully

Tools & Technologies Used

The stack applied across all five modules

1

HTML5

Semantic elements, ARIA, accessibility standards

2

CSS3

Grid, Flexbox, custom properties, media queries

3

JavaScript (ES6+)

DOM manipulation, async/await, Fetch API

4

Web Storage API

Client-side data persistence (localStorage)

5

REST APIs

Real-time data integration

6

Deployment

Vercel / Netlify / Render

Learning Outcomes & Skills Gained

Technical and professional takeaways from the internship

Front-End Development

Semantic HTML5 & ARIA accessibility

CSS Grid, Flexbox & responsive design

CSS custom properties & theming

JavaScript Engineering

DOM manipulation & event delegation

State management & local persistence

Async/await, Fetch API & error handling

Professional Practices

Modular, maintainable project architecture

Client-side routing & asset optimization

Live deployment to Vercel / Netlify / Render

Challenges & Key Learnings

Reflections from the internship journey

Debugging asynchronous logic

Learned to trace race conditions and handle failed network requests gracefully using try/catch with async/await.

Designing for all screen sizes

Adopted a mobile-first workflow, testing breakpoints iteratively rather than retrofitting responsiveness at the end.

Managing application state

Moved from ad-hoc DOM updates to a structured, predictable state-and-render pattern for the To-Do application.

Shipping to production

Gained first-hand experience with build optimization, environment configuration and live deployment pipelines.

Certificate of Completion

Official recognition of successful internship completion

Certificate ID: THX-JUL3026-504 | Issued by Thiranex – Skill Development & Future Tech | Signed: Hariharan M, Founder & CEO

Conclusion

This internship at Thiranex provided a comprehensive, hands-on progression through the full web development lifecycle — from accessible semantic markup to a live, deployed full-stack application. Each milestone built directly on the last, resulting in a strong, practical foundation in modern front-end engineering and deployment practices, along with the confidence to design, build and ship production-ready web applications independently.
